

THE VIRGINIA CAREER AND LEARNING CENTER WEBSITE

The Virginia Career and Learning Center for School Mental Health Professionals (CLC) website offers professional development and career opportunities for school counselors, school social workers, school psychologists, and other licensed school mental health professionals in Virginia Public Schools. The site is funded by a federal award to the Virginia Department of Education (VDOE).

The CLC website provides an abundance of resources and instructional modules that will help school mental health professionals (SMHPs) foster safe and inclusive school communities and promote emotional wellness for students. The CLC has three important content areas:

- **The Learning Center** is frequently updated with new conferences and courses to help enhance professional knowledge. Many courses have quizzes with certificates that document engagement hours.
- **The Credential Hotspot** section, accessible to all professionals of the featured school divisions, provides training modules created by VDOE content area experts. SMHPs can earn certificates and collect badges that document completion of the modules.
- **The Resource Library** features carefully selected resources that are meant to support SMHPs as they support students. VDOE resources give guidance on timely and critical topics and provide content specific to each SMHP role.

LEARNING CENTER

The Learning Center hosts 2 types of videos that are relevant to all school mental health professionals: conferences and courses. Content can be explored choosing the **By Conference**, **By Course** or **By Topic** filters to find what best fits your interests and needs.

Exploring by **BY CONFERENCE**

Beginning in 2020, a series of virtual synchronous conferences and symposiums hosted by VDOE were recorded and are available to be watched when convenient. Subject matter experts have prepared presentations on timely topics relevant to all school mental health professionals.

Use the dropdown menu to view the conferences available.

Exploring by **BY COURSE**

Specific courses designed by the VDOE Office of Student Services comprise most of the resources available in the Learning Center. Some courses consist of instructional video modules with knowledge checks and certificates that document engagement hours and some courses are a series of asynchronous presentations from invited subject matter experts.

Use the dropdown menu to view the courses available.

Exploring by **BY TOPIC AND SEARCH BAR**

The dropdown menu under By Topic allows for exploration of content related to a specific topic of interest. Conferences and courses are showcased in the results.

The Search bar can be used for a more refined search within our library of educational content.
